

Transform public sector operations with speed, simplicity, and less risk

Drive mission impact and lower costs using GROW with SAP

GROW
WITH
SAP

Streamline operations

Public sector finance organizations are under continuous pressure to provide service and oversight while dealing with resource challenges. Managing financial transactions and closing the books are just the beginning. To meet the mission, your finance team must use and provide near-real-time insights that **drive decisions, spur resilience, and support compliance.**

Increase mission impact

Rising to these challenges demands a new approach: an agile, powerful ERP solution that helps you standardize financial data, increase the efficiency of routine processes, and improve insights from business data.

That's why we offer GROW with SAP, an offering that helps you adopt cloud ERP cost-effectively, with speed, predictability, and continuous innovation.

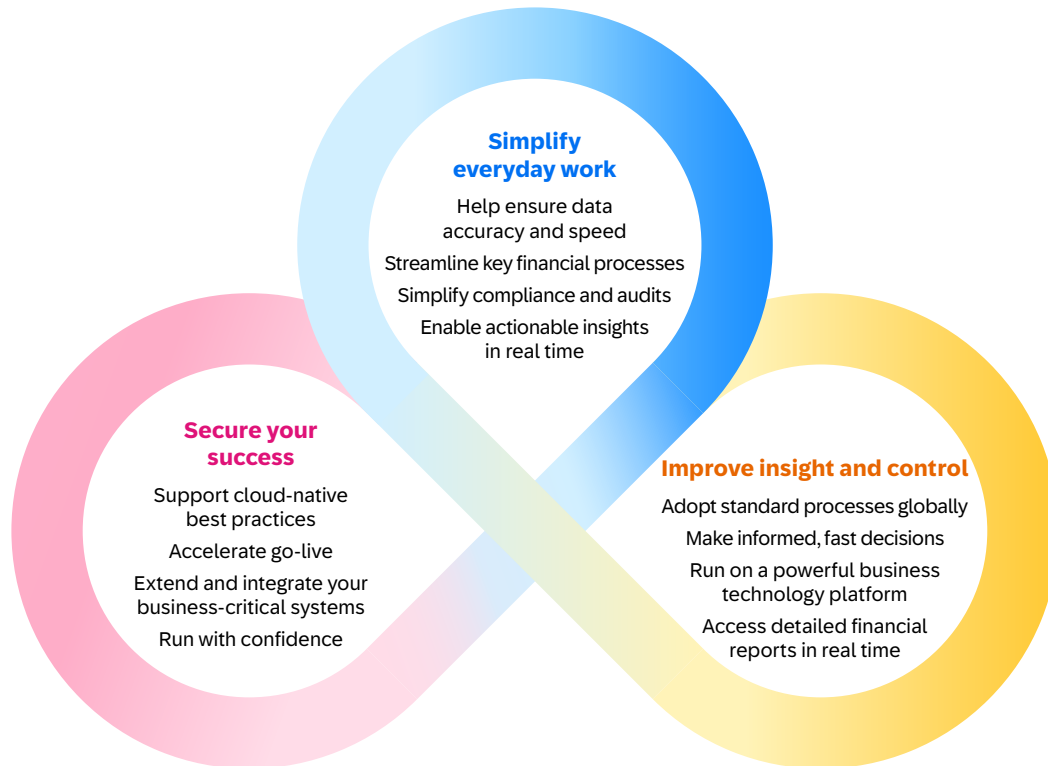

GROW with SAP includes cloud-native ERP solutions, along with support for industry best practices, adoption

acceleration services, a collaborative community, and learning offerings. Its foundation is SAP S/4HANA Cloud Public Edition, a powerful and ready-to-run cloud ERP solution (see the [figure](#) on the next page).

Using GROW with SAP, your team can generate valuable real-time insights that revolutionize operational excellence. AI-driven processes support advanced automation, simplify decision-making, and improve risk and compliance management.

Figure: How GROW with SAP helps you meet the mission

Simplify everyday work

Future-proof technology empowers innovation

GROW with SAP empowers your finance team to be more productive by using automated processes supported by a single, connected cloud ERP solution. The real-time cloud environment lets you take advantage of the latest technology innovations.

The offering makes financial information available across the organization without reconciling data from multiple sources. Additionally, it enables integration across HR, finance, asset management, and procurement

departments. AI-infused assistance streamlines processes such as soft close, continuous accounting, cost sharing, indirect cost calculation, and billing. Record-to-report AI features also speed and simplify period-close activities.

You can automate fund accounting entries for multiple bases of accounting, including asset and lease management. Fund and grant data is integrated with core processes such as purchasing and human resources.

Work faster with automation and insight.

Improve insight and control

Powerful tools support proactive decision-making

GROW with SAP helps you make informed, fast financial and operational decisions with live access to intuitive dashboards and simulation tools. Automated accounting and financial reporting processes help you monitor financial performance, run programs efficiently, and shape policy.

You can manage budgets, earmarks, and grants with a comprehensive audit trail and flexible workflows. Embedded analytics dashboards offer robust KPIs for funds, grants, and budgets. With payment, invoice, and

Do more with a unified, AI-enabled solution.

encumbrance data on a single screen, you can analyze budgetary impact throughout the financial process.

Transparency and auditability of detailed financial and human resources transactions enable cross-departmental planning. Automated anomaly detection and prevention help mitigate fraud risk and reduce losses.

Make finance strategic

Advanced features support adaptability

GROW with SAP frees your finance team from rote tasks to focus on steering the organization while scaling processes to meet new requirements. An integrated and modular suite of applications helps you adapt to change at your pace.

You can create plans and forecasts based on real-time financial data using features such as AI-driven processes, drag-and-drop visualization, predictive analytics, and simulation tools, which are all available within GROW with SAP.

Financial consolidation tools help users orchestrate financial close activities efficiently. The offering supports budget management and grants and fund accounting, and it handles compliance to help you keep public trust. With these features, your team can achieve better outcomes while maintaining decision-making control and protecting data privacy.

With GROW with SAP, your organization can move into the future with confidence.

GROW with SAP also helps you meet your mission and adapt to future change by extending your SAP S/4HANA Cloud Public Edition solution with advanced financial capabilities. These include governance, risk, and compliance management; sustainability reporting; treasury management; and embedded cybersecurity features.

The Joule copilot, which is embedded in SAP S/4HANA Cloud Public Edition, uses AI technologies to help detect anomalies, identify exceptions, and recommend actions. It also helps your finance team eliminate manual, redundant processes. AI capabilities can help you get more from your cloud ERP solution by improving efficiency through automation, making strategic funding decisions, producing reliable budget forecasts, and delivering personalized citizen services.

Equip your organization for today and prepare for tomorrow's challenges. GROW with SAP can help.

Secure your success

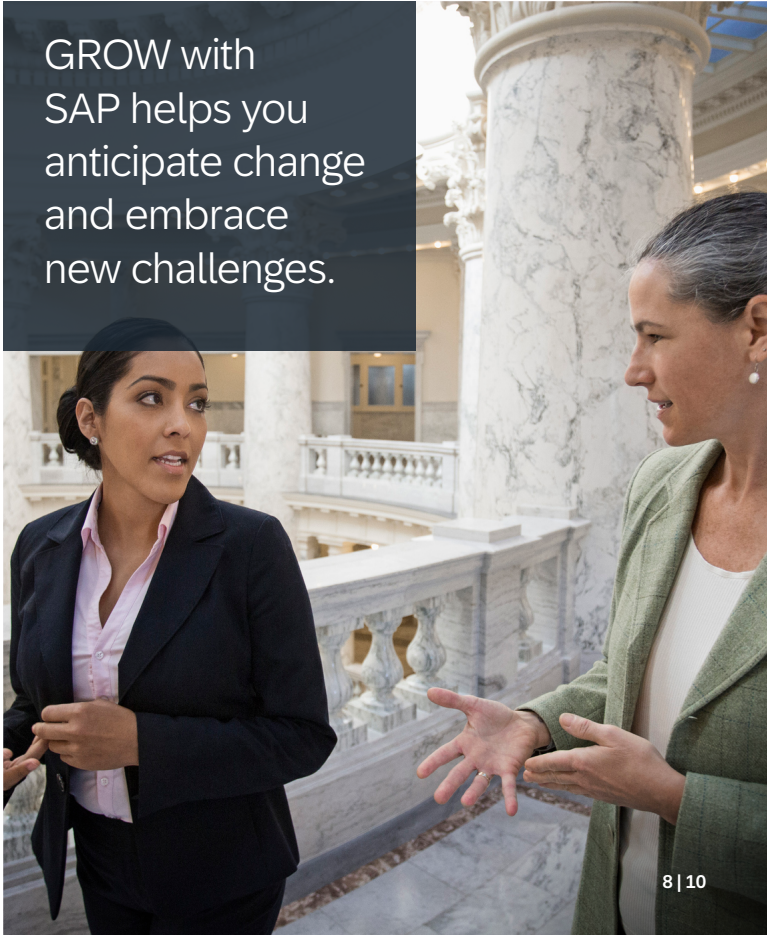

Cloud ERP helps you continuously innovate

GROW with SAP enables you to go live with predictability and run with confidence.

The offering helps you avoid deployment surprises with a predictable scope and time frame. Guided tools and the Accelerate for GROW with SAP approach expedite your solution rollout. To build user skills and improve adoption, you can choose from more than 300 flexible learning and training offerings.

Ongoing updates help ensure that your organization is ready for changes in your industry or regulatory mandates. Because GROW with SAP runs in the cloud, you get the latest innovations as they develop, without having to wait for the next major release.

Continuous security updates protect your peace of mind, keeping your organization's data current and addressing patches and cybersecurity challenges in real time.
